

COVID – 19 UPDATE

The Derrick Motor Inn is committed to the health and safety of our valued guests, our staff, and their families. To achieve this goal, we have implemented procedures to enhance our already high standard of cleaning and disinfecting of all guest rooms and common areas. Hospital grade cleaners are being used and increased frequency of sanitization of all hard surfaces including but not limited to, doorknobs, light switches, remote controls, tabletops, and railings. Because we do use keys, they are sanitized before given to and after return from each guest. Upon check-out, all guest rooms are completely stripped and disinfected and will remain vacant for several days. Daily reminders are given to staff re-enforcing the need for washing and sanitization of hands, wearing masks and gloves, maintaining distances, and avoiding physical contact.

We are monitoring and following the guidelines of our local health authorities taking all necessary precautions to achieve the highest level of safety possible. Any guest with a reservation who is experiencing any symptoms is encouraged to cancel, without penalty.
